

**Toeplitz operators on weighted spaces of analytic functions**  
**José Bonet**  
**Workshop on Functional and Complex Analysis, Valladolid, June**  
**2022**

Joint work with Wolfgang Lusky and Jari Taskinen.

We present several results about continuity and compactness of Toeplitz operators defined on weighted Banach spaces  $H_v^\infty$  of analytic functions with sup-norms. In particular, we study the case of exponential weights  $v(r) = \exp(-\alpha/(1-r)^\beta)$ ,  $\alpha, \beta > 0$  on the unit disc of the complex plane.
